MEP

Limbach has been a cornerstone in the building industry since 1901, growing our technical portfolio year by year. As an MEP firm, we provide best-in-class engineering, fabrication, installation, service and maintenance of complex mechanical, electrical and plumbing systems.

Why Limbach?

Limbach sets itself apart as a best-in-class MEP provider through:

- **Limbach Modeling & Production System.** Customized database integrated into Building Information & Modeling tools results in a LEAN approach, generating design, estimation, coordination, fabrication and installation processes from a single model. Provides real-time cost impact to design changes and labor management feedback.
- **Limbach Engineering & Design Services.** In-house engineering firm. Takes a Target Value Solution approach to engineering, utilizing Limbach Modeling & Production System to integrate design and construction.
- **Target Value Solution.** Begins with the lowest cost MEP solution that will meet the owner's needs, keep compliant with Code and provide the lowest life cycle cost. Lower initial cost allows enhancements to be added, putting the Owner in control of the systems solutions that deliver the highest value overall.
- **Hearts & Minds.** The Hearts & Minds safety culture translate to "boots on the ground" through Limbach's safe work practices, which are reinforced through activities that go far beyond typical construction safety protocols. Peers, building owners and safety professionals recognize Limbach as a leader and innovator in safety culture and process.

CONSTRUCTION

SERVICE

Mechanical

Our best-in-class mechanical systems include the engineering, construction and service of:

- Heating, Ventilation and Air Conditioning Systems
- Sheet Metal Fabrication & Installation
- Laboratory Exhaust Systems
- Boiler Systems
- Chilled Water Systems
- Steam Systems
- Mechanical Insulation
- Automatic Temperature Controls
- System Commissioning

Electrical

Our best-in-class electrical systems include the engineering, construction and service of:

- Electrical Power Service
- Underground Duct Banks & Conduit
- Power Centers & Circuit Breakers
- Electrical Switchgear
- Distribution Panels & System
- Interior & Exterior Lighting
- Power Generators

Plumbing

Our best-in-class plumbing systems include the engineering, construction and service of:

- Domestic Water System
- Sanitary Piping Systems
- Grease Traps
- Storm Piping System
- Plumbing Equipment
- Fixtures & Trim
- Medical Gas Systems

Controls

Our best-in-class controls systems include the engineering, construction and service of:

- Building Automation & Management Systems
- System Integration
- Data Analytics
- Energy Management Systems
